PROFESSIONAL SUMMARY

Full-stack software engineer who built PlasticCash, a plastic waste pick-up and payments platform backed by 180+ automated tests, and ScreenHive, a Dockerized booking API, while leading design and technology at Ecocyclers after three years managing its operations. Seeking an entry-level software engineering or junior developer role to build reliable, user-focused products with Python, FastAPI, TypeScript and Next.js.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, SQL, HTML, CSS
- **Frontend:** React, Next.js, Tailwind CSS
- **Backend:** FastAPI, REST APIs, SQLModel, SQLAlchemy, Alembic, JWT authentication, Server-Sent Events, Paystack payment webhooks
- **Databases & Caching:** PostgreSQL (Supabase), Redis; database transactions and row-level locking
- **Testing:** Pytest, unit testing, integration testing, automated test suites
- **DevOps & Tools:** Git, GitHub, GitHub Actions (CI), Docker, Figma, WordPress

PROJECTS

PlasticCash: Plastic Waste Buy-Back Platform **github.com/DevBonavee/PlastiCash**
Next.js, React, TypeScript, Tailwind CSS, FastAPI, PostgreSQL (Supabase), Redis, Paystack

- Enabled people in Enugu to schedule plastic waste pick-ups and get paid directly to their bank accounts by building a full-stack web platform for Ecocyclers with Paystack payouts.
- Ensured no seller is ever paid twice or overdrawn by engineering a ledger-based wallet with PostgreSQL row-level locking and idempotent payment webhooks.
- Verified payment, wallet and dashboard behaviour with 180+ automated tests across the platform.
- Gave sellers, collectors and admins their own views of the platform by developing role-based dashboards, with SMS confirmation codes and push notifications to keep each user informed.

ScreenHive: Cinema Seat Booking API **github.com/DevBonavee/Cinema_Booking_API**
Python, FastAPI, SQLModel, PostgreSQL, Redis, Alembic, Docker, GitHub Actions

- Delivered a complete booking flow (browse films and showtimes, hold seats, book and pay through Paystack) by designing and building a REST API with FastAPI.
- Prevented double-booking under concurrent requests by wrapping seat reservations in PostgreSQL transactions with row-level locking.
- Secured the API and kept seat availability live by implementing JWT authentication with role-based access, Redis caching, rate limiting and real-time seat updates via Server-Sent Events.
- Made the application consistent to run and update by containerizing it with Docker, managing schema migrations with Alembic and automating checks with a GitHub Actions CI workflow.

PROFESSIONAL EXPERIENCE

Head of Design and Technology Development **Dec 2025 – Present**
Ecocyclers Integration Limited | Enugu State, Nigeria

- Improved the company website's layout, navigation and user experience by redesigning it on WordPress.
- Keep the website's content, pages and features up to date by managing and maintaining it.
- Brought the PlasticCash platform (see Projects) to the company by leading its design and technology initiatives.

Operations Manager **Mar 2023 – Dec 2025**
Ecocyclers Integration Limited | Enugu State, Nigeria

- Improved waste collection efficiency by 25% by leading 10+ grassroots waste management initiatives.

- Reduced operational costs by 30% through strategic planning and logistics optimization.
- Increased local participation by 40% by developing a community engagement program.
- Expanded Ecocyclers' outreach by coordinating partnerships with three key stakeholders.

EDUCATION

Software Development Training **Jul 2026 – Nov 2026**
AfricaPlan Foundation
- Coursework: React, Next.js, TypeScript, Python, FastAPI and PostgreSQL.

Political Science (Major) **Jan 2017 – Nov 2022**
University of Nigeria, Nsukka
- Relevant modules: Public Policy Analysis, International Relations, Environmental Politics, Peace and Conflict Studies, Strategic Studies and Defence.

CERTIFICATIONS

Software Development Certificate **Nov 2026**
AfricaPlan Foundation

AI and AI Automation Course **Oct 2026**
TSAcademy

Virtual Assistant Course **Oct 2025**
ALX

VOLUNTEER EXPERIENCE

Tech Team Member **Sept 2026 – Dec 2026**
Google Developer Group | Enugu State, Nigeria
- Mapped a clear sign-up journey for conference attendees by designing the UI and user flow for the GDG conference registration website in Figma.
- Turned the Figma designs into a working registration platform using AI-assisted development with Claude.
- Brought ticket sales and attendee sign-ups into one flow by integrating registration with ticketing partner Lapspad.

User Research Participant **Jan 2024 – Jan 2024**
Hover Inc. | Enugu State, Nigeria
- Supplied usability insights by completing daily product tasks and providing user-experience feedback.
- Contributed user perspectives in group discussions on how people interact with the product.
